**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/18/07 has been entered.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6,8-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Kushner et al (6633839).

As per claims 1,2,5,6, Kushner et al (6633839) teaches a distributed speech recognition system with a subscriber unit (col. 1 lines 5-10, Fig. 1) showing a feature

extraction module (as extracting mfcc values – fig. 7); using a voice activity detection module for voice activity (col. 6 lines 34-59); and a wireless transmitter to transmit the detected activity and the features over a distributed voice recognition system (Figs. 1,2, and 3).

As per claims 3,4, Kushner et al (6633839) teaches the VAD indicator before the plurality of features (col. 6 lines 34-44; examiner notes that the packet of data will be decoded with the VAD indicator information first, so that the resynthesizer has the proper information as to what type of voiced/unvoice/silence data is contained in the packet – col. 8 lines 58-67).

As per claims 8,14,20, Kushner et al (6633839) teaches the use of 2 bits to command the speech synthesizer in terms of what type of speech activity is contained in the frame (col. 6 lines 34-38).

As per claims 9,10,15,16,21,22, Kushner et al (6633839) teaches using the speech recognition information for hands free voice dialing or hand free information retrieval (col. 1 lines 15-20) in a DSR (col. 1 lines 40-50).

As per claims 11-13,17-19,23-25, Kushner et al (6633839) teaches detection of silence (based on a limit of 4subframe energy comparison), features are frequency based (col. 6 lines 42-45), and lower bit rate during silence (col. 6 lines 58-65).
